THE BANK STATEMENT.

Saturday, March 3-p. m. By the operations of the New-York Sub-Treasury in the week ended last night, which included payments of \$13,520 for purchased Pacific Railroad bonds, the associated banks lost \$1,218,-The weekly bank statement pubto-day showed an average increase in cash of \$761,100. There was a gain in legal-tender notes of \$1,150,400, but this was offset in part by a locs of \$289,200 in specie. The this city was continued through the week, and the increase in legal-tender notes proved the substantial accuracy of estimates. A contraction of \$1,914,200 in loans with the small changes in other items reflected clearly the general stagnation in business. The statement was unusually consistent in its details. The result of all the changes was a further gain of \$1,011,400 in the surplus reserve, and the banks held in excess of legal requirements \$75,778,900, against \$6,503,125 in the corresponding week a year ago and \$21,292,225 at the same time in the preceding

WHAT WAS DONE IN STOCKS.

The sharp rally in the stock market was adequate proof that the depression yesterday was only a speculative reaction. In the case of every distinct movement there is always, at first, a shaking out of weak and consequently dangerous accounts. The reaction undoubtedly was highly successful and no opportunity was given either to small holders or the weak ones to regain their position except at a loss. In the case of American Sugar Refining, for instance, the opening was at an advance of ½ per cent and the first price was the lowest. It closed just below its highest point with a virtual recovery of the loss suffered vesterday. This was the most active stock, but the activity and strength of the Caranger shares were more interesting and and Chicago, Burlington and Quincy 1 per cent. There was no news in regard to them apart from the reports of earnings, which were more favorable than had been expected. The closing was strong and, as a rule, final changes were advances, although there were occasional exceptions. Of these the most conspicuous was New-York Central, which was heavy, although it finally showed an immaterial decline.

COMPARISON.

ATCHISON fours sell about 70; they are a first mortgage on the largest railroad in the world, and they precede about 200 millions of securities which are absolutely worthless until the Honds are taken care of in full. Would you consider a first mortgage on a house in Newan enormous amount of Ronds and rentals for leased lines.

We believe investors can make 20 to 40 per cent in two years or less by selling their lone NEW YORK CENTRAL, and buying ATCHISON or Reading fours. The Reading is were selling around 60 when first strongly recommended by us; they are now above 75. If you want intelligent advice and correct discrimination when investing or speculating you should be on our list and have our letters. We don't write a bull letter every day in the year, although in that way you are always in it when the rise comes, and the more unexpected the rise the more sugarcius you appear to be, particularly to those who didn't start reading a year ago. We prefer to give warning as our betters on file show we did last spring, and when the Repeal bill passed. It curtails business a fulle at times, but we have been function in our place.

WE WOULD LIKE YOU TO CALL OR SEND FOR CURT CIRCULAR AND SATURDAYS MARKET LETTER. WHICH CONTAINS OUR VIEWS UP TO DATE ON THE MARKET.
